HB1002

VARIOUS TAX MATTERS (BROWN T) Repeals a provision that would require the budget agency to transfer the amount of combined excess reserves that exceed \$2,500,000,000 in calendar year 2022 to the pre-1996 account of the Indiana state teachers' retirement fund. Amends provisions that provide for an automatic taxpayer refund if sufficient excess reserves are available to: (1) clarify the tax return filing requirement for a refund; (2) require that refunds be distributed before May 1 of the calendar year immediately following the year in which a determination is made that the state has excess reserves; (3) remove provisions that require a taxpayer to have adjusted gross income tax liability in order to qualify for the refund; and (4) remove provisions that require the refund to be made in the form of a refundable tax credit. Provides that the minimum valuation limitation applicable to the total amount of a taxpayer's assessable depreciable personal property in a taxing district is 30% of the adjusted cost of the depreciable personal property purchased before January 2, 2022. Provides an exemption from the 30% minimum valuation

limitation for new depreciable personal property purchased after January 1, 2022. Requires the department of local government finance to develop or amend forms for property taxation of assessable depreciable personal property. Repeals the utility receipts and utility services use taxes. Provides a state income tax credit for property taxes paid on certain business personal property. Specifies a formula for determining the amount of the credit. Removes the double direct test currently applied in production sales tax exemptions. Phases down the individual adjusted gross income tax rate from 3.23% in 2022 to 3% in 2026 and thereafter. Allows a taxpayer to elect a special property tax valuation method for mini-mill equipment. Requires a utility that is subject to the jurisdiction of the Indiana utility regulatory commission (IURC) for the approval of rates and charges to file a rate adjustment with the IURC that adjusts the utility's rates and charges to reflect the repeal of the utility receipts tax. Requires a utility that is: (1) subject to the utility receipts tax; and (2) not under the jurisdiction of the IURC; to adjust the utility's rates and charges to reflect the repeal of the utility receipts tax. Requires each utility to provide notice to the utility's customers that the adjustment in rates and charges reflects the repeal of the utility receipts tax. Specifies definitions for the income tax credit for property taxes paid on certain business personal property. Specifies how certain taxpayers claim the tax credit. Specifies taxpayer procedure for the repeal of the utility receipts and utility services use tax. Makes conforming changes.

(2) Provides that the written agreement between the attaching entity and the pole owner must establish the process by which the attaching entity may apply for access to the pole owner's poles. (3) Sets forth: (A) a time frame for the pole owner to respond to the attaching entity's application based on the number of poles included in the application; and (B) a pole owner's duty to do one of the following within that time frame: (i) Approve the application and authorize the attaching entity to make the attachments without the need for any make ready work. (ii) Submit to the attaching entity an invoice setting forth all necessary make ready work, the estimated make ready costs, and the estimated make ready completion date. (iii) Reject all or part of the attaching entity's application based on certain concerns that cannot be resolved by make ready work. (4) Specifies that an attaching entity must have the pole owner's written permission specifically authorizing an attachment for each pole on which the attaching entity seeks to place an attachment. (5) Provides that if the attaching entity violates this requirement, the attaching entity shall pay to the pole owner accrued rental fees for each pole on which an unauthorized attachment is made, dating back to the date the attachment is considered to have been made under existing law, plus a \$500 penalty for each pole on which an unauthorized attachment is made. (6) Provides that before January 1, 2023, if a contract granting the pole owner's written permission for an attachment to a particular pole does not exist at the time an attachment is made, the attaching entity shall pay to the pole owner accrued rental fees for each pole on which an attachment is made without a contract authorizing the attachment on that pole, dating back to the date the attachment is considered to have been made under existing law, plus any penalty that may be prescribed for such an attachment under any existing contract between the pole owner and the attaching entity. (7) Provides that if, after December 31, 2022, the attaching entity has not paid all accrued rental fees for such attachments made before January 1, 2023, the attaching entity shall, in addition to the accrued rental fees that remain outstanding, be liable for the \$500 fine that otherwise applies for each pole on which such an attachment was made before January 1, 2023, and for which the attaching entity has not paid all accrued rental fees. (8) Changes from 90 days (under current law) to 60 days the amount of time by which an attaching entity is responsible for transferring an authorized attachment after receiving written notice from the pole owner to do so. Makes a corresponding change in the amount of time after which the pole owner may rearrange, transfer, or relocate the attaching entity's system (or portion of the system) after the attaching entity has failed to do so. (9) Provides that the pole owner is immune from civil liability for the pole owner's actions in rearranging, transferring, or relocating the attaching entity's system, as long as the pole owner exercises reasonable care in taking such actions, and unless the pole owner's actions constitute gross negligence or willful or wanton misconduct. (10) Creates the offense of unlawful pole attachment, a Class C misdemeanor, for the knowing and intentional attachment to a pole without the pole owner's written permission specifically authorizing the attachment.

SMALL MODULAR NUCLEAR REACTORS (KOCH E) Amends the statute governing certificates of public convenience and necessity (certificates) that are issued by the Indiana utility regulatory commission (IURC) for the construction, lease, or purchase of electric generation facilities to require the IURC, in consultation with the department of environmental management (department), to adopt rules concerning the granting of certificates for the construction, purchase, or lease of small modular nuclear reactors: (1) in Indiana for the generation of electricity to be used to furnish public utility service to Indiana customers; or (2) at the site of a nuclear energy production or generating facility that supplies electricity to Indiana retail customers on July 1, 2011. Requires the IURC to adopt the rules not later than July 1, 2023. Provides that the rules adopted by the IURC must provide that in acting on a public utility's petition for a certificate for one or more small modular nuclear reactors, the IURC shall consider the following: (1) Whether, and to what extent, the one or more small modular nuclear reactors proposed by the public utility will replace a loss of generating capacity in the public utility's portfolio resulting from the retirement or planned retirement of one or more of existing electric generating facilities that: (A) are located in Indiana; and (B) use coal or natural gas as a fuel source. (2) Whether one or more of the small modular nuclear reactors will be located on the same site as or near the facility to be retired and, if so, potential opportunities for the public utility to: (A) make use of any land and existing infrastructure or facilities already owned or under the control of the public utility; or (B) create new employment opportunities for workers who have been, or would be, displaced as a result of the retirement of the existing facility. Provides that the IURC's rules must provide that the IURC may grant a certificate under circumstances and for locations other than these. Sets forth additional requirements for small modular nuclear reactors that must be included in the IURC's rules, including the requirement that the owner or operator of a proposed small modular nuclear reactor must provide evidence of a plan to apply for all licenses or permits to construct or operate the proposed small modular nuclear reactor required by the United States Nuclear Regulatory Commission, the department, or any other relevant state or federal regulatory agency. Amends the statute providing certain financial incentives for energy utilities that invest in clean energy projects by providing that, for purposes of the statute, a "clean energy project" and a "nuclear energy production or generating facility" include a small modular nuclear reactor that is constructed after June 30, 2023: (1) in Indiana for the generation of electricity to be used to furnish public utility service to Indiana customers; or (2) at the site of a nuclear energy production or generating facility that supplies electricity to Indiana retail customers on July 1, 2011; under the rules adopted by the IURC under the bill. Defines "small modular nuclear reactor" for purposes of the bill's provisions.

WASTEWATER INFRASTRUCTURE (KOCH E) Provides that the Indiana finance authority (authority) shall serve as the executive branch coordinator for funds allocated or made available to the state or local communities from federal, state, and other sources for purposes related to drinking water, wastewater, or storm water infrastructure and systems. Sets forth the duties of the authority with respect to this role. Specifies that the authority shall coordinate the executive branch activities related to the state's drinking water and wastewater programs. (Current law provides that the authority shall serve such a role with respect to the state's water programs.) Authorizes the establishment of a drinking water and wastewater infrastructure research and extension program (program) to provide data collection and information, training, and technical assistance concerning: (1) drinking water infrastructure; (2) wastewater infrastructure; and (3) storm water infrastructure; in Indiana. Provides that the authority may: (1) contract with a

state supported college or university in Indiana to provide the program; and (2) financially support the program from existing funds appropriated to the authority. Provides that the program may be housed within, or share staff with, the existing research and highway extension program at Purdue University. Provides that the program may provide the following services and programs to, or for the benefit of, utilities providing drinking water, wastewater, or storm water service in Indiana: (1) Assisting utilities in the development of asset management programs. (2) Serving as a central repository for data concerning infrastructure used to provide drinking water, wastewater, or storm water service in Indiana. (3) Providing training and technical assistance to utilities and Indiana's drinking water, wastewater, and storm water utility industry workforces. Requires the authority to make, not later than July 1, 2023, all: (1) utility asset management programs; and (2) information concerning utility asset lifecycle management costs; submitted to or reviewed by the authority available on an Internet web site maintained by the authority or the program. Requires that in carrying out all information gathering and reporting duties under the bill's provisions, the authority and the program shall use any data the authority or the program acquires in a manner that: (1) protects the confidential information of individual utilities and customers; and (2) is consistent with applicable statutory exclusions from disclosure under the state's public records act. Provides that as a condition for receiving a loan, grant, or other financial assistance after June 30, 2023, through the wastewater revolving loan program, the drinking water revolving loan program, the water infrastructure assistance program, or the water infrastructure grant program, a participant must do the following: (1) Submit the participant's required asset management program to the authority not later than the time of submission of the participant's preliminary engineering report for any project for which the loan, grant, or other financial assistance will be provided. (Current law does not specify when the asset management program must be submitted.) (2) Submit to the authority information on the estimated and actual life cycle management costs over the useful life of the asset financed. (3) In the case of a participant that is not under the jurisdiction of the Indiana utility regulatory commission (IURC), regularly report to all: (A) customers; (B) counties; and (C) municipalities; within the participant's service territory information concerning the participant's asset management program. Provides that money in the: (1) supplemental drinking water and wastewater assistance fund; (2) water infrastructure assistance fund; and (3) water infrastructure grant fund; may be used to provide grants, loans, or other financial assistance for the planning, designing, acquisition, construction, renovation, improvement, or expansion of septic relief systems, in accordance with guidelines of the authority. Provides that the authority's project prioritization system for awarding assistance from the water infrastructure assistance fund and the water infrastructure grant fund must include as a variable the effect of a project on the environment. Provides for the following with respect to a wastewater utility that is not subject to the jurisdiction of the IURC for the approval of rates and charges and that has been issued one or more enforcement orders (orders) relating to environmental or health and human safety issues by the department of environmental management (department) after June 30, 2022: (1) For the first order, the utility is subject to an informal review of its: (A) rates and charges; and (B) asset management program; by the IURC, in accordance with procedures determined by the IURC. (2) For a second order that is issued within two years of the first order, the utility is subject to rate regulation, following two base rate cases, by the IURC for a minimum period of: (A) five years from the IURC's order in the first base rate case; and (B) one year from the IURC's order in the second base rate case. (3) For any order issued during the required rate regulation period, the IURC may, in consultation with the department, initiate a receivership proceeding with respect to the utility. Requires the state board of education (state board) to approve, for purposes of the state's career and technical education graduation pathway, a utility career cluster that allows students to acquire knowledge and skills related to employment in the electric, natural gas, communications, water, and wastewater utility industries. Requires the governor's workforce cabinet, in consultation with the state board, the department of education, and the department of workforce development, to create course sequences for the utility career cluster.

SB273

FINANCING OF WATER AND WASTEWATER UTILITY ASSETS (KOCH E) Provides that the IURC may approve periodic tracking mechanisms for water or wastewater utilities to permit such utilities to recover the following: (1) Changes in property taxes. (2) With respect to customers located within the geographic boundaries of local units of government, incremental costs of operation and maintenance resulting from policies or ordinances that are adopted by those local units and that the IURC determines to be unusual but not necessarily unreasonable. Requires the IURC to adopt rules to define what is unreasonable with respect to road cut permits and other specifications or policies established by a local unit that imposes costs on water or wastewater utilities. Amends the statute concerning wholesale water sales between small water utilities by increasing from 5,000 to 8,000 the threshold number of customers served by a water utility (as either a purchaser or supplier) for purposes of the statute. Amends the statute governing infrastructure improvement charges for water or wastewater utilities as follows: (1) Specifies that an "eligible infrastructure improvement" includes: (A) a project to relocate existing utility plant, including projects to accommodate the construction, reconstruction, or improvement of a highway, street, or road; and (B) a project that does not increase revenues by connecting to new customers, even if the project provides greater available capacity with respect to an eligible utility's distribution or collection plant. (2) Sets forth distinctions for public utilities, municipally owned utilities, and not-for-profit utilities with respect to: (A) costs that are eligible for recovery under the statute; (B) the factors the IURC may consider in determining the amount of allowable cost recovery; and (C) the resetting of the adjustment amount after a base rate case. (3) Specifies that the limitation restricting total adjustment revenues to 10% of an eligible utility's most recently approved base revenue level does not apply with respect to property taxes associated with eligible infrastructure improvements. Amends provisions in the Indiana Code chapter concerning a utility company's acquisition of an offered water or wastewater utility, by providing that the rates charged by the acquiring utility company are not considered to increase unreasonably as a result of the acquisition if the net original cost of the acquired assets does not exceed 2% of the acquiring utility company's net original cost rate base as determined in the acquiring utility's most recent general rate case, plus any adjustments to the rate base resulting from: (1) an infrastructure improvement charge; or (2) an adjustment rider for service enhancement improvement costs; that have occurred after the rate case. Makes a similar change to the Indiana Code section concerning the sale of a municipally owned utility's nonsurplus utility property.

Changes the amount of litigation expenses a court shall allow a defendant in any trial in an eminent domain proceeding in which the amount of damages awarded to the defendant by the judgment is greater than the amount specified in the plaintiff's last offer of settlement.
